

# FOSTER<sup>®</sup> PATIENT RECLINER

## Information Guide

### CLEANABILITY

The Foster Patient Recliner offers a 360° wipeout along with standard removable covers and a removable seat.

### BACK RECLINE AND FOOTREST

The back and footrest work independently, with the ability to lay completely flat, which offers a comfortable sleeping alternative.

### CONTROLS

The Patient Recliner can be configured with various controls on each side, including a footrest lever, central brake and steer, recline activation levers and reverse incline.

### ARMS

Pivoting armrests on both sides of the chair allow a side access for the patient and caregiver. Arm caps available in grey polyurethane to match other controls.

### COMFORT

Passive built-in lumbar support, dual density seat suspension with molded foam, sinuous springs and an optional adjustable headrest all speak to the user needs and provide comfort.
