

# RÜHE™

## Information Guide

### VERSATILE PUBLIC SEATING

A wide variety of public settings including hospitals, airports, waiting areas, and educational environments. RÜhe is available in guest, lounge, and patient variations with complimentary stand-alone and linking tables.

### INVERTED CURVE ARMS

Arms provide a natural cradle for the forearm, while the arm caps allow for ease of ingress and egress. Arm caps are available in polyurethane (3 finishes), solid surface (1 finish) and solid wood arm caps (3 finishes).

### COMFORT

Comfortable molded foam for the seats and backs on all models.

### CLEANABILITY

A soft cleanout between the seat and back provides ease of cleaning.

### THIN FRAME

Supporting up to 400 lbs, RÜhe has a highly durable 14-gauge steel frame. Available in 3 finishes all contributing to a highly customizable product family.

### WALL-SAVER

A wall-saver design prevents the body of the chair from making full contact with a wall and prevents wall damage.
