

# MANTRA<sup>®</sup>

# MANTRA

## FIND YOUR FOCUS – FIND YOUR MANTRA.

### WHAT

- + Designed by a member of Allseating's talented design and development team, Nita Chakravarty, Mantra is an exquisite and adaptable seating solution suitable for a variety of executive spaces—from small offices and private meeting rooms, to small, formal conference and boardrooms.
- + Inspired by European elegance, Mantra combines sophistication with functionality, forming the perfect solution for contemporary spaces.
- + With a namesake that represents focus and motivation, Mantra is an essential component to productivity in modern workspaces.
- + Inspired by a Lemniscate (the mathematical symbol representing the concept of infinity), Mantra's distinctive Lemni Arm is an integral part of the chair that connects the seat, back and arms.

### WHY

- + While modern workspaces are continually changing, the need for functional, timeless, and suave designs that exude European elegance continue to prevail.
- + While workspaces are always transforming, there is still a strong need for classically beautiful seating designs for private meeting rooms and smaller, conference areas.
- + Offices want to foster a space that inspires those within it through the use of bold and innovative design.
- + The boardroom continues to be a space where companies can make a memorable first impression and a design statement.

### HOW

- + Mantra comes in two (2) back heights, mid back and low back, allowing users to select the unique solution that best suits their needs.
- + Mantra features an upholstered insert on the back that is standard on the low back and optional on the mid back. This insert allows for more customization in comfort and design.
- + The Lemni arm is available in polished aluminum, with the option for Black or Birch polyurethane inlays (the inlay will match the frame finish). Choose from two (2) base options, available on both low and mid backs: casters or lounge base.
- + The lounge base comes with a Swivel mechanism for simple mobility. An auto-return cylinder comes standard to ensure uniformity when users exit the chair.

### DESIGNER

- + Nita Chakravarty earned her Bachelor of Arts and Bachelor of Design respectively at the University of Toronto and the Ontario College of Art and Design. Prior to her work with Allseating, she worked at Feature Walters, an architectural fabrication company.
