AND CHROME FRAME FINISH.

**TUCK INTO  
DYNAMIC  
GATHERINGS.**

Collaboration is vital to the success of an organization. The ability to bring people together in productive environments now needs to happen anywhere and at anytime. Tuck is a highly portable, storable and versatile seating solution that is ideal for educational, healthcare, and corporate environments.

AND CHROME FRAME FINISH WITH ALUMINUM BASE.

**TUCK INTO PRODUCTIVE  
CONVERSATIONS.**

Tuck Collaborative gives designers a streamlined design solution that is suitable for small boardrooms, executive meeting rooms and touch-down workstations. The ability for Tuck to be used in a variety of purposes throughout the space creates visual continuity.

MESH BACK IN M11 MIXTAPE AND CHROME FRAME FINISH.

## TUCK INTO VERSATILE DESIGN.

Tuck has been recognized with a GOOD DESIGN™ Award from The Chicago Athenaeum: Museum of Architecture and Design as well as a Best of NeoCon Award. Engineered without fasteners to create a linear and clean aesthetic, Tuck's highly durable structure is rated to support up to 350 lbs. That makes it a tough chair that still looks great at the end of a long day.

## MIX AND MATCH.

The Tuck collection features over 20 distinct models that span a range of heights, frame designs, and material options. Polypropylene shells can be specified in 11 unique colors while frames can be painted to match or finished in a classic chrome. For Tuck Meshback models, back frames can be specified in 3 nylon colors while the mesh selection features 18 colors over 3 patterns. All components can be mixed and matched, creating a variety of styles that can compliment any space.
